EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joe Kim on August 29, 2005.

The application has been amended as follows: claim 1: line 6, "substantially" and line 10, "substantially" have been deleted.

REASONS FOR ALLOWANCE

1. Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a liquid crystal display device comprising a combination of various elements as claimed, more specifically, a plurality of first electrodes formed on the first substrate on the side that faces the liquid crystals, wherein the plurality of first electrodes comprise *only* a plurality of first slits extending substantially parallel with respect to each other in a plurality in pixel region, and a second electrode formed on the second substrate on the side that faces the liquid crystals, wherein the second electrode comprises *only* a plurality of second slits with and extending in a direction substantially right angles of the first slits in the plurality of pixel regions, as viewed in a direction perpendicular to the substrate surface.

Art Unit: 2871

Song ('244) discloses a liquid crystal display device comprising electrodes having a plurality of slits. However, Song fails to disclose a liquid crystal display device comprising a combination of various elements as claimed, more specifically, 'a plurality of first electrodes formed on the first substrate on the side that faces the liquid crystals, wherein the plurality of first electrodes comprise only a plurality of first slits extending substantially parallel with respect to each other in a plurality in pixel region, and a second electrode formed on the second substrate on the side that faces the liquid crystals, wherein the second electrode comprises only a plurality of second slits with and extending in a direction substantially right angles of the first slits in the plurality of pixel regions, as viewed in a direction perpendicular to the substrate surface'.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
